**THE LIFE CYCLE OF
HATCHERY BORN,
OCEAN-RAISED
WILD ALASKAN SALMON**

Chum Salmon return in early June between the ages of three and six, feeding in the ocean between two and five years.

Sockeye Salmon return mid-June at ages four and five (in ocean either two or three years).

Coho Salmon feed in the ocean for one year (and return as age three) in late August.

Chinook Salmon return mid-June at different ages (three to six) but they depart the hatchery at age two.

Freshwater raceway for Sockeye, Coho and Chinook.

Salt water net pens for Chum and Pink.
