Wally Noerenberg Hatchery
Pink Salmon Barrier Net Deployment, Removal and Transportation
January 12, 2017

1. INTRODUCTION

Project Overview

Prince William Sound Aquaculture Corporation (PWSAC) is a non-profit corporation founded in 1974 by a local commercial fishermen's organization to optimize Alaska's wild salmon resources. PWSAC produces hatchery-born, ocean-raised wild salmon for the commercial, sport, personal use, and subsistence fisheries in the Prince William Sound and Copper River regions. With headquarters in Cordova, Alaska, PWSAC operates four remote salmon hatcheries in Prince William Sound and one on the Copper River in Paxson. Approximately 600 million salmon fry and smolt are produced annually for release into Pacific waters. The returning adults benefit all user groups.

The Wally Noerenberg Hatchery (WNH) is a PWSAC-owned hatchery located in Lake Bay on the southern end of Esther Island in Prince William Sound, approximately 20 miles east of Whittier. The hatchery was built in 1985. WNH is currently permitted for 148 million pink, 165 million chum, 4 million coho, and 4 million Chinook salmon eggs annually.

PWSAC is soliciting proposals to provide professional services to deploy, remove, and transport the WNH barrier net for the 2017 season.

2. PROJECT BACKGROUND

a) Location of Delivery

- Deployment: The barrier net will be staged palletized on the boat ramp at the hatchery. The contractor will transfer from the WNH boat ramp, work directly with the hatchery manager to secure the net's lead line to its cork line and deploy the barrier net in the deployment location in Lake Bay as specified by the hatchery manager.
- Removal: The contractor will remove the barrier net from Lake Bay and transport the net to the Armin F. Koernig Hatchery (AFK) dock. The contractor will work directly with the hatchery manager to transfer the net from its vessel to the AFK dock upon arrival.

b) Budget

PWSAC has not established a Maximum Allowable Price for the project. However, to maximize the use of available funds and provide overall value, proposers are encouraged to propose betterments and cost efficiencies to the project.

c) Completion Schedule

- Deployment: on or before July 15, 2017.
- Removal: on or before September 1, 2017.
